CARBOHYDRATE RESEARCH

Subject index

Acetolysis
The acetolysis of D-galactose diethyl dithioacetal 189
Acetylation
The acetolysis of D-galactose diethyl dithioacetal 189
N-Acetyllactosamine
Chemical synthesis of a hexasaccharide comprising the Lewis^x determinant linked β-(1 → 6) to a linear trimannosyl core and the precursor pentasaccharide lacking fucose 101
Albedo
Extraction, characterisation, and enzymatic degradation of lemon peel pectins 271
Alditol, *N*-(*p*-nitrobenzyloxy)amino- derivative
Improved protocol for the formation of *N*-(*p*-nitrobenzyloxy)aminoalditol derivatives of oligosaccharides 1
Alditol sulfonic acids
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
Aldohexoses
On the sweetness properties of aldoses: characterization of molecular active sites by computer simulation 25
Allopyranose
Synthesis of 1,2-anhydro-D-altropyranose and -D-allopyranose benzyl ethers 315
Alpha-amylase
Elucidation of the subsite structure of bacterial saccharifying alpha-amylase and its mode of degradation of maltose 171
Altropyranose
Synthesis of 1,2-anhydro-D-altropyranose and -D-allopyranose benzyl ethers 315
6^1-(6-Aminohexyl)amino-6^1-deoxycyclomaltoheptaose
The crystal structure of 6^1-(6-aminohexyl) amino-6^1-deoxycyclomaltoheptaose 125
Amylopectin
Maize starch fine structures affected by ear developmental temperature 157
Amylopectins
The chemical structure of amylose and amylopectin fractions of starch from tobacco leaves during development and diurnally–nocturnally 247
Amylose
Maize starch fine structures affected by ear developmental temperature 157
The chemical structure of amylose and amylopectin fractions of starch from tobacco leaves during development and diurnally–nocturnally 247
Anti-AIDS virus activity
Synthesis of sulfated octadecyl ribo-oligosaccharides with potent anti-AIDS virus activity by ring-opening polymerization of a 1,4-anhydroribose derivative 113
Anti-HIV agents
4-(Arylamino)phenyl α-D-glucopyranosides as potential anti-HIV agents 293
Antioxidant
Synthesis and iron binding studies of *myo*-inositol 1,2,3-trisphosphate and (±)-*myo*-inositol 1,2-bisphosphate, and iron binding studies of all *myo*-inositol tetrakisphosphates 81
Aryl glucopyranosides
4-(Arylamino)phenyl α-D-glucopyranosides as potential anti-HIV agents 293

Benzyl ethers
Synthesis of 1,2-anhydro-D-altropyranose and -D-allopyranose benzyl ethers 315
Binding
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD$_n$) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65

Branching
The chemical structure of amylose and amylopectin fractions of starch from tobacco leaves during development and diurnally–nocturnally 247
Burkholderia pickettii
Structure of the O-specific polysaccharide from *Burkholderia pickettii* strain NCTC 11149 263

Cellulose
Synthesis of *p*-toluenesulfinic esters of cellulose and β-cyclodextrin 307
Chlorogenic acid
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
Compensation temperature
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
Crystal structure
Synthesis and structural characterization of 6^I, 6^{II}-diamino-6^I,6^{II}-dideoxy-cyclomaltoheptaose, a difunctionalized β-cyclodextrin 41
Crystal structure of anhydrous hexakis-(2,3,6-tri-*O*-methyl)-cyclomaltohexaose (permethyl-α-cyclodextrin) grown from hot water and from cold NaCl solutions 53
The crystal structure of 6^I-(6-aminohexyl)-amino-6^I-deoxycyclomaltoheptaose 125
Cyclodextrin
The crystal structure of 6^I-(6-aminohexyl)-amino-6^I-deoxycyclomaltoheptaose 125
α-Cyclodextrin
Crystal structure of anhydrous hexakis-(2,3,6-tri-*O*-methyl)-cyclomaltohexaose (permethyl-α-cyclodextrin) grown from hot water and from cold NaCl solutions 53
β-Cyclodextrin
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
The crystal structure of 6^I-(6-aminohexyl)-amino-6^I-deoxycyclomaltoheptaose 125
Synthesis of *p*-toluenesulfinic esters of cellulose and β-cyclodextrin 307
Cyclodextrins
Synthesis and structural characterization of 6^I, 6^{II}-diamino-6^I,6^{II}-dideoxy-cyclomaltoheptaose, a difunctionalized β-cyclodextrin 41
Cyclomaltoheptaose
Synthesis and structural characterization of 6^I, 6^{II}-diamino-6^I,6^{II}-dideoxy-cyclomaltoheptaose, a difunctionalized β-cyclodextrin 41
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65

Decarboxylation
Decarboxylation of a sialic acid derivative 181
Dielectric relaxation
A comparative study of the dielectric relaxation behaviour of glucose, maltose, and their mixtures with water in the liquid and glassy states 193
Difunctionalized β-cyclodextrin
Synthesis and structural characterization of 6^I, 6^{II}-diamino-6^I,6^{II}-dideoxy-cyclomaltoheptaose, a difunctionalized β-cyclodextrin 41
Dithioacetal
The acetolysis of D-galactose diethyl dithioacetal 189

Enthalpy–entropy compensation
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
Enzymic degradation
Extraction, characterisation, and enzymatic degradation of lemon peel pectins 271
Extraction
Extraction, characterisation, and enzymatic degradation of lemon peel pectins 271

Food industry
Effect of gamma irradiation on the macromolecular integrity of guar gum 223
Free-radical bromination
Radical-mediated bromination of peracetylated 5-thio-D-xylopyranosyl bromides: an easy access to the corresponding anomeric orthothiolactones 237
Fucopyranosyl glycans
Chemical synthesis of a hexasaccharide comprising the $Lewis^x$ determinant linked β-(1 → 6) to a linear trimannosyl core and the precursor pentasaccharide lacking fucose 101
Fucosidase inhibitor
Novel conversion of aldopyranosides into 5-thioaldopyranosides via acyclic monothioacetals with inversion and retention of configuration at C-5 207

D-Galactose
The acetolysis of D-galactose diethyl dithioacetal 189
Gamma irradiation
Effect of gamma irradiation on the macromolecular integrity of guar gum 223
Glass transition
A comparative study of the dielectric relaxation behaviour of glucose, maltose, and their mixtures with water in the liquid and glassy states 193
Glucose
A comparative study of the dielectric relaxation behaviour of glucose, maltose, and their mixtures with water in the liquid and glassy states 193
Glucosides
4-(Arylamino)phenyl α-D-glucopyranosides as potential anti-HIV agents 293
Guar gum viscosity
Effect of gamma irradiation on the macromolecular integrity of guar gum 223

High mannose chains
Mannose receptor dependent uptake of ricin A_1 and A_2 chains by macrophages 285
High resolution NMR
Synthesis of sulfated octadecyl ribo-oligosaccharides with potent anti-AIDS virus activity by ring-opening polymerization of a 1,4-anhydroribose derivative 113
HILIC
Improved protocol for the formation of *N*-(*p*-nitrobenzyloxy)aminoalditol derivatives of oligosaccharides 1
Hydrogel
Characterization of carbohydrate components of an unusual hydrogel formed by seed coats of *Magonia pubescens* (Tingui) 325
Hydrogen bonding
Molecular dynamics simulations of glycosides in aqueous solution 13
Hydrogen bonds
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
1-Hydroxy-2-propanone acetals
Efficient synthesis of pyruvic acetals of carbohydrate vicinal diols: 3,4-*O*-(1-methoxycarbonyl)ethylidene-D-galactopyranoside and 5,6-*O*-(1-methoxycarbonyl)ethylidene-D-galactofuranoside, via 1-hydroxy-2-propanone acetals 299

(±)-*myo*-Inositol 1,2-bisphosphate
Synthesis and iron binding studies of *myo*-inositol 1,2,3-trisphosphate and (±)-*myo*-inositol 1,2-bisphosphate, and iron binding studies of all *myo*-inositol tetrakisphosphates 81
myo-Inositol tetrakisphosphates
Synthesis and iron binding studies of *myo*-inositol 1,2,3-trisphosphate and (±)-*myo*-inositol 1,2-bisphosphate, and iron binding studies of all *myo*-inositol tetrakisphosphates 81
myo-Inositol 1,2,3-trisphosphate
Synthesis and iron binding studies of *myo*-inositol 1,2,3-trisphosphate and (±)-*myo*-inositol 1,2-bisphosphate, and iron binding studies of all *myo*-inositol tetrakisphosphates 81

LC–MS, on-line
Improved protocol for the formation of *N*-(*p*-nitrobenzyloxy)aminoalditol derivatives of oligosaccharides 1
Lemon
Extraction, characterisation, and enzymatic degradation of lemon peel pectins 271
Lewis^x
Chemical synthesis of a hexasaccharide comprising the Lewis^x determinant linked β-(1 → 6) to a linear trimannosyl core and the precursor pentasaccharide lacking fucose 101
Ligand–receptor interaction
On the sweetness properties of aldoses: characterization of molecular active sites by computer simulation 25
Lipopolysaccharide
Structure of the O-specific polysaccharide from *Burkholderia pickettii* strain NCTC 11149 263

Macrophages
Mannose receptor dependent uptake of ricin A_1 and A_2 chains by macrophages 285
Magonia pubescens (Tingui)
Characterization of carbohydrate components of an unusual hydrogel formed by seed coats of *Magonia pubescens* (Tingui) 325
Maize
Maize starch fine structures affected by ear developmental temperature 157
Maltooligosaccharides
Elucidation of the subsite structure of bacterial saccharifying alpha-amylase and its mode of degradation of maltose 171
Maltose
A comparative study of the dielectric relaxation behaviour of glucose, maltose, and their mixtures with water in the liquid and glassy states 193

Maltosyl transfer
Elucidation of the subsite structure of bacterial saccharifying alpha-amylase and its mode of degradation of maltose 171
β-D-Mannose
Effect of gamma irradiation on the macromolecular integrity of guar gum 223
Methyl glycosides
Molecular dynamics simulations of glycosides in aqueous solution 13
Molecular dynamics
Molecular dynamics simulations of glycosides in aqueous solution 13
Molecular dynamics simulation of sugar conformation
On the sweetness properties of aldoses: characterization of molecular active sites by computer simulation 25
Molecular modelling
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
Monosubstituted cyclomaltoheptaose
The crystal structure of 6^1-(6-aminohexyl)-amino-6^1-deoxycyclomaltoheptaose 125

O antigen
Structure of the O-specific polysaccharide from *Burkholderia pickettii* strain NCTC 11149 263
Oligosaccharide
Synthesis of sulfated octadecyl ribo-oligosaccharides with potent anti-AIDS virus activity by ring-opening polymerization of a 1,4-anhydroribose derivative 113
Oligosaccharides xyloglucan
Improved protocol for the formation of *N*-(*p*-nitrobenzyloxy)aminoalditol derivatives of oligosaccharides 1

Pectin
Extraction, characterisation, and enzymatic degradation of lemon peel pectins 271
Plant lectins
Mannose receptor dependent uptake of ricin A_1 and A_2 chains by macrophages 285
PNB derivative
Improved protocol for the formation of *N*-(*p*-nitrobenzyloxy)aminoalditol derivatives of oligosaccharides 1
Polybromides
Radical-mediated bromination of peracetylated 5-thio-D-xylopyranosyl bromides: an easy access to the corresponding anomeric orthothiolactones 237
Polysaccharide
Effect of gamma irradiation on the macromolecular integrity of guar gum 223
Pyruvic acetals
Efficient synthesis of pyruvic acetals of carbohydrate vicinal diols: 3,4-*O*-(1-methoxycarbonyl)ethylidene-D-galactopyranoside and 5,6-*O*-(1-methoxycarbonyl)ethylidene-D-galactofuranoside, via 1-hydroxy-2-propanone acetals 299

X-Ray structures
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
Ring-opening polymerization
Synthesis of sulfated octadecyl ribo-oligosaccharides with potent anti-AIDS virus activity by ring-opening polymerization of a 1,4-anhydroribose derivative 113
RP-HPLC
Molecular dynamics simulations of glycosides in aqueous solution 13

Seed coats
Characterization of carbohydrate components of an unusual hydrogel formed by seed coats of *Magonia pubescens* (Tingui) 325
Sialic acid
Decarboxylation of a sialic acid derivative 181
Siderophore
Synthesis and iron binding studies of *myo*-inositol 1,2,3-trisphosphate and (±)-*myo*-inositol 1,2-bisphosphate, and iron binding studies of all *myo*-inositol tetrakisphosphates 81
Solution structure
Molecular dynamics simulations of glycosides in aqueous solution 13
Starch
Maize starch fine structures affected by ear developmental temperature 157
The chemical structure of amylose and amylopectin fractions of starch from tobacco leaves during development and diurnally–nocturnally 247
Subsite structure
Elucidation of the subsite structure of bacterial saccharifying alpha-amylase and its mode of degradation of maltose 171
Sulfated alkyl ribofuranan
Synthesis of sulfated octadecyl ribo-oligosaccharides with potent anti-AIDS virus activity by ring-opening polymerization of a 1,4-anhydroribose derivative 113

Sulfinic esters reactions
Synthesis of *p*-toluenesulfinic esters of cellulose and β-cyclodextrin 307
Sulfonic acids
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
Sweetness
On the sweetness properties of aldoses: characterization of molecular active sites by computer simulation 25
Synthesis
The crystal structure of 6^1-(6-aminohexyl)-amino-6^1-deoxycyclomaltoheptaose 125
Synthesis of *p*-toluenesulfinic esters of cellulose and β-cyclodextrin 307

Talose
Molecular dynamics simulations of glycosides in aqueous solution 13
Taurine analogues
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
Thermodynamics
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65
5-Thio-D-glucopyranosyl bromides
Radical-mediated bromination of peracetylated 5-thio-D-xylopyranosyl bromides: an easy access to the corresponding anomeric orthothiolactones 237
5-Thio-D-glucose
Novel conversion of aldopyranosides into 5-thioaldopyranosides via acyclic monothioacetals with inversion and retention of configuration at C-5 207
5-Thio-D-xylopyranosyl bromides
Radical-mediated bromination of peracetylated 5-thio-D-xylopyranosyl bromides: an easy access to the corresponding anomeric orthothiolactones 237
5-Thio-L-galactose
Novel conversion of aldopyranosides into 5-thioaldopyranosides via acyclic monothioacetals with inversion and retention of configuration at C-5 207
5-Thio-L-idose
Novel conversion of aldopyranosides into 5-thioaldopyranosides via acyclic monothioacetals with inversion and retention of configuration at C-5 207
Thio sugar
Novel conversion of aldopyranosides into 5-thioaldopyranosides via acyclic monothioacetals with inversion and retention of configuration at C-5 207
5-Thio sugars ortholactones
Radical-mediated bromination of peracetylated 5-thio-D-xylopyranosyl bromides: an easy access to the corresponding anomeric orthothiolactones 237
Tobacco leaves
The chemical structure of amylose and amylopectin fractions of starch from tobacco leaves during development and diurnally–nocturnally 247
p-Toluenesulfinate
Synthesis of *p*-toluenesulfinic esters of cellulose and β-cyclodextrin 307
Toxins
Mannose receptor dependent uptake of ricin A_1 and A_2 chains by macrophages 285
Transglycosylation
Elucidation of the subsite structure of bacterial saccharifying alpha-amylase and its mode of degradation of maltose 171
Trimethyl-α-cyclodextrin
Crystal structure of anhydrous hexakis-(2,3,6-tri-*O*-methyl)-cyclomaltohexaose (permethyl-α-cyclodextrin) grown from hot water and from cold NaCl solutions 53
Tumor antigens
Chemical synthesis of a hexasaccharide comprising the $Lewis^x$ determinant linked β-(1 → 6) to a linear trimannosyl core and the precursor pentasaccharide lacking fucose 101

Water
A comparative study of the dielectric relaxation behaviour of glucose, maltose, and their mixtures with water in the liquid and glassy states 193
Water activity
Polymerized cyclomaltoheptaose (β-cyclodextrin, β-CD_n) inclusion complex formation with chlorogenic acid: solvent effects on thermochemistry and enthalpy–entropy compensation 65

Zwitterions
Sulfoaminoglucitols: synthesis of 2-amino-2,3 (and 2,6)-dideoxy-D-glucitol-3 (and 6)-sulfonic acids and X-ray crystal structure of the monohydrate of the 6-sulfo derivative 137
